Silver Sneakers Classic Light

The design of our Silver Sneakers Classic Light class, taught by instructor Cindy Atkinson and Monica Holman, is to work on increasing muscle strength, flexibility, and core strength to help your balance all while using your own body resistance, light weights, and exercise bands! Using a chair as an option, the class works with light weights and resistance bands to give you a workout without having to be on your feet. This lessens the impact of exercise on your joints. We recommend this class especially for those with arthritis, as this class has less pressure on joints. This low-impact exercise is perfect for older adults to build strength and stay active.

Silver Sneakers Classic

This class is designed for ages 55 plus; however, all adults with the desire to gain core strength are welcome to join. Each participant will learn the importance of stretching and building core muscles for the improvement of body stability. With the aid of chairs, exercise balls, weights and bands, participants can safely and easily improve their core health for better stability and mobility helping to safe guard against injuries due to falling.
